- Station 8
- Station 9

Key Insights:

- Petrol contributes the highest delivery cost, indicating it dominates logistics operations.
- Eastern and Greater Accra regions show higher delivery volumes, suggesting strong demand concentration.
- Delivery efficiency (~4.3%) indicates relatively low logistics cost compared to revenue, which is positive.
- Top-performing stations (e.g., Station 1 & Station 11) handle a significant share of fuel distribution.
- Monthly delivery trend shows fluctuations with peaks around mid-year, indicating possible seasonal demand
